

## LISTING OF THE CLAIMS

1. – 15. (Cancelled)

16. (Previously Presented) Confectionery dispenser comprising:

at least two confectionery article magazines, each said at least two confectionery article magazines comprising a magazine outlet being coupled with at least one confectionery article dispenser outlet by means of at least one magazine discharge arrangement;

said magazine discharge arrangement comprising at least one confectionery article fitting compartment adapted for performing a movement relative to said magazine outlets upon activation of an activation arrangement and thereby transferring at least one confectionery article comprised in at least one confectionery article magazine to at least one output compartment; and

said at least one output compartment being adapted for performing a rotating movement upon activation of said activation arrangement and thereby transferring at least one confectionery article comprised in at least one of said output compartments to said dispenser outlet.

17. (Previously Presented) Confectionery dispenser according to claim 16, wherein said confectionery article magazines are exchangeable.

18. (Previously Presented) Confectionery dispenser according to claim 16, wherein said output compartment is mechanically coupled with said at least one outlet and thereby facilitating a transfer of at least one confectionery article upon activation of said activation arrangement.

19. (Previously Presented) Confectionery dispenser according to claim 16, wherein the activation arrangement is manually driven.

20. (Previously Presented) Confectionery dispenser according to claim 16, wherein the activation arrangement is automatically driven.
21. (Previously Presented) Confectionery dispenser according to claim 16, wherein said article comprises chewing gum packages.
22. (Previously Presented) Confectionery dispenser according to claim 16, wherein said magazine discharge arrangement comprises at least one confectionery article fitting compartment being rotatable upon activation by said activation arrangement.
23. (Previously Presented) Confectionery dispenser according to claim 16, wherein said magazines are fitted to the dispenser in a substantially vertical direction thereby obtaining a gravity facilitated emptying of the magazines into lower compartments when activating the magazine discharge arrangement.
24. (Previously Presented) Confectionery dispenser according to claim 16, wherein said magazines are fitted in a substantially circular profile, when seen from above.
25. (Previously Presented) Confectionery dispenser according to claim 16, wherein the magazines define an orientation of the magazine contained article.
26. (Previously Presented) Confectionery dispenser according to claim 16, wherein the magazines are substantially translucent, thereby facilitating that a user of the dispenser may visually see at least some of the magazine contained articles.
27. (Previously Presented) Confectionery dispenser according to claim 16, wherein the magazines are arranged within a substantially translucent housing.

28. (Previously Presented) Confectionery dispenser according to claim 16, wherein said confectionery articles are fed to said discharge arrangement by means of at least two confectionery article holding magazines.
